

KEY FEATURES

- Made from durable materials that can withstand high temperatures and pressures
- Transparent design allows for easy visual inspection during installation
- Different coupler sizes are color-coded for easy identification
- Provides a secure and tight fit for reliable capping
- Can be easily connected and disconnected without the need for any tools
- Suitable for use in the field for fast and efficient installations

Microduct Caps

Microduct caps for a secure seal

The microduct cap is a reliable solution for sealing microduct quickly and securely without the need for specialized tools. It is an ideal product for telecom, datacenters, and fiber optic applications, where the installation of microduct is a common requirement.

The easy-to-use microduct cap is designed for fast installation and a secure seal for microduct. Apply the cap to the corresponding microduct size until the cap clicks securely. The transparent polycarbonate aids in visual confirmation the cap is secure to the microduct. The press-fit design in the cap ensures a tight and secure connection with the microduct. This helps to prevent any accidental disconnections or leaks. Additionally, the cap is equipped with a quick release feature, allowing for easy and fast removal when needed. This simplifies the maintenance and repair process, saving time and effort.

Overall, the microduct cap is a must-have tool for professionals who frequently work with microduct. The specific engineering design and excellent durability make it a smart choice for any project that involves the installation of microduct.
