

STAINLESS STEEL SLOTTED MACHINE SCREWS

Features:

- Manufactured in type 316 stainless steel to meet any stringent sanitary condition
- Polished with standard Calbrite finish to increase corrosion resistance and aesthetic appearance
- Provides excellent strength and durability to service a variety of installation requirements
- Tensile Strength = 70,000 lbs
- Pan Head Style
- No package quantity required

Applications:

Calbrite's stainless steel Machine Screws have a slightly rounded top that gives a neat appearance on visible metal joints. The external threads are designed to go through a hole or nut that is pre-tapped to form a mating thread for the screw. The type 316 stainless steel is used to provide great corrosion resistance, as well as superior strength at low or high temperatures.

Part Number	Size	A (in)	L (in)	D (in)	Phillips Drive	Drill Size	Weight per EA (lb)
