

SPEEDCUT CRIMPFORCE STORM JAW

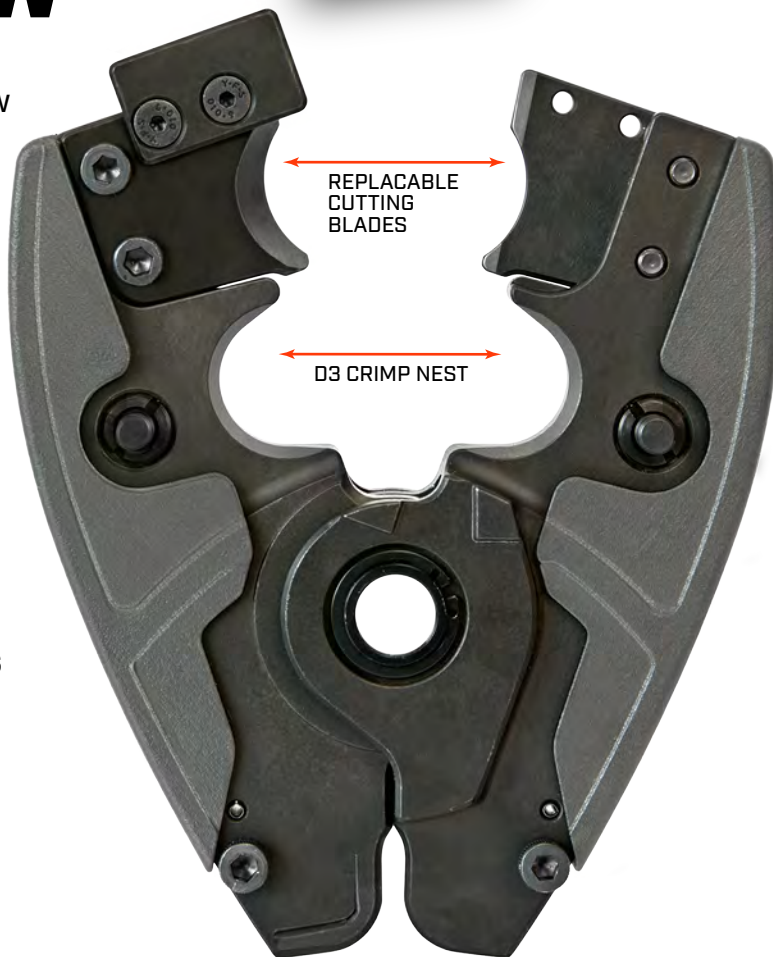

NEW

BUILT FOR
EVERYTHING
THAT'S ON
THE LINE.™

Introducing the revolutionary SpeedCut CrimpForce Storm Jaw engineered by Huskie Tools. Our patent-pending **SpeedCut CrimpForce Storm Jaw** sets a new standard for speed and reliability in storm repair work. This innovative design allows linemen to cut and crimp with unparalleled efficiency, reducing downtime and increasing productivity in critical storm recovery situations.

The name "**SpeedCut**" highlights its rapid cutting capabilities, while "**CrimpForce**" ensures precise, durable, and secure connections. Built for power and precision, this tool is the ultimate solution for "warriors of the weather & wire" working in high-pressure environments.

CUTTING
BLADES

D3 CRIMP NEST

EVS-NDCUTJAW

6-TON INLINE
SLA-RL7ND w/
EVS-NDCUTJAW

JUST THE FACTS

The new Huskie Tools **EVS-NDCUTJAW STORM JAW** can cut the conductor with the blades at the top, then make the crimp on a splice or lug with the D3 nest and appropriate die set with a single 6-ton tool and this new, industry first multi-functional jaw.

The blades are made to cut up to 4/0 ACSR, ACAR, AAC and AAAC cables used in full-tension and semi-tension overhead applications that require a 6-ton crimping tool. This jaw fits Huskie's popular inline crimping tools including all SL-*ND, SLC-*ND, and SLA-*ND products making it extremely versatile across a variety of Huskie inline tools.

The die chart lists the most common crimp dies for service entrance application and connectors up to 4/0 requiring a 6-ton application.
