

Krylon Products Group
101 Prospect Avenue, N.W.
Cleveland, Ohio 44115-1075

Re: Greenhouse Gas Reduction

Dear Environmental, Health & Safety Manager,

Krylon Products Group (KPG) makes your job easier by taking a proactive approach to offer products that are Greenhouse Gas (GHG) free, and providing a variety of MRO products – all from a single source. Krylon has the selection, the distribution network and the expertise to offer the right maintenance paints, coatings, brushes, rollers, lubricants, electronic cleaners, degreasers, adhesives and caulks. We have both performance and environmentally responsible solutions.

Krylon is committed to assisting members of the U.S. Climate Action Partnership (USCAP) who have pledged to slow, stop, and reverse the growth of Greenhouse Gases, along with the EPA Climate Leader Partners, (over 200 strong and growing) who have pledged to reduce GHG in their facilities. To assist these groups and others like them, Krylon Products Group has implemented the GHG Free Program. We adhere to several design principles of the USCAP and EPA Climate Leader Partners by:

- Identifying our GHG free products, the GHG free Icon will be added to the labels as they are updated
- Researching new technology for alternatives to Greenhouse Gases
- Providing a non-aerosol alternative for current products
- Providing a 100% recyclable container
- Encouraging early action to reduce GHG in facility maintenance products
- Identifying GHG free products

Please contact your local sales representative or call customer service with inquiries on Greenhouse Gas Free products.

Thank you for your time. We look forward to working with you and your team in the near future.

Regards,
Richard Posatiere
